- Multitasking
- Critical Thinking
- Responsible

- Identifying where to start
- Often communicates poorly

- Online Communication
- Provided Research materials

- Time Management

ICT Field of Work

FULL STACK DEVELOPER

A Full Stack Developer is someone who works with the Back End — or server side — of the application as well as the Front End, or client side. Full Stack Developers have to have some skills in a wide variety of coding niches, from databases to graphic design and UI/UX management in order to do their job well.

SOFTWARE DEVELOPER

Software developers are the creative, brainstorming masterminds behind computer programs of all sorts.

VIDEO GAME DEVELOPER

A video game developer is a software developer specializing in video game development – the process and related disciplines of creating video games. Self-funded developers are known as independent or indie developers and usually make indie games.
